

## **QUICK SUMMARY OF CHAPTERS FOR INTERVIEWERS**

### **CHAPTER 1 – OPENING STATEMENT**

This book is an introduction to 20 different areas of afterlife evidence. It aims to provide the key words, books and website for further research. Each chapter gives details of the leading experts and the main findings. Most people are surprised to learn that highly intelligent scientists and other professionals have been gathering evidence for 150 years.

### **CHAPTER 2 - SCIENTISTS WHO INVESTIGATED**

Hundreds of highly qualified scientists investigated the evidence and found that the afterlife exists. Sir William Crookes and the early scientists were most convinced by materialization mediumship which is almost unknown

today.

### **CHAPTER 3- OUR EXPERIENCES WITH MATERIALIZATION**

For the last 7 years we have studied a very rare kind of medium. In his presence, people who have died materialize, walk around the room and talk to us. We witnessed more than 100 reunions between people who have died and their loved ones still living. Wendy's father materialised as did my sister. We have tape recordings of our conversations with some famous people now in spirit who also materialised.

### **CHAPTER 4- NEAR-DEATH EXPERIENCES**

Fourteen facts drawn from research that prove that near death experiences are really evidence of the afterlife and not just the workings of a dying brain.

### **CHAPTER 5- OUT OF BODY EXPERIENCES**

There is evidence that many people are able to travel out of their bodies and visit the afterlife. Many talk with their loved ones who are living

there. They describe both hellish and heavenly areas that they visit.

## **CHAPTER 6 PSYCHIC ABILITIES**

Scientists have proved in laboratory experiments that telepathy, clairvoyance, precognition and communication through dreams exist. These are the basis of how we communicate with the afterlife.

## **CHAPTER 7 REMOTE VIEWING**

For more than 20 years the United States government spent 70 million dollars a year on a psychic spying program called "remote viewing". This has been studied extensively by top scientists and found to be real. These are abilities which are the basis of how we communicate with the afterlife.

## **CHAPTER 8 DEATHBED VISIONS**

Detailed studies have been done of people who are dying and say that they see visions of heaven and their loved ones who come to take them away. Sometimes they see people who they did not know had died- and they are always correct. There are many others reasons that these experiences are not hallucinations.

## **CHAPTER 9 AFTER DEATH CONTACTS**

Throughout the world many people see and hear from their loved ones after they have died. Their loved ones tell them things that they could not possibly know which are later proved right. There are several good reasons why these visits are real.

## **CHAPTER 10 MENTAL MEDIUMS TESTED**

Mental mediums have recently been tested and found to be genuine in many university controlled experiments at the University of Arizona, the Windbridge Institute and the University of Virginia. Studies were conducted by the Church of England and recently by Professor Archie

Roy and Trisha Robertson of the Scottish Society for Psychical Research.

### **CHAPTER 11. 'PSYCHIC DETECTIVES'**

For millions of television viewers around the world to-day, watching the very popular and very successful television 'Psychic Detectives' is their first experience of seeing evidential psychic mediumship. This chapter looks at the testimony of usually highly sceptical police officers who acknowledge that the information given by the best of these psychic mediums was incredibly accurate.

### **CHAPTER 12. SENSING MURDER (N.Z.)—MENTAL MEDIUMSHIP**

This television series showed some of the most gifted mediums giving accurate details about cold cases that no-one could have known. The organizers of this series selected the very best mediums- out of seventy five who applied to participate, the top three were chosen. They were asked for details of the crime, the location and the killer.

### **CHAPTER 13. TRANCE MEDIUMS INVESTIGATED**

Some mediums can go into a deep trance. They are unconscious and unaware of what is happening while a spirit person speaks through them. Scientists spent years studying three mediums who were exceptionally gifted: American Leonora Piper (1857- 1950) – she was one of the most spectacular and outstanding trance mediums who ever lived. British Mrs Gladys Osborne Leonard (1882-1968) and British Mrs Eileen Garrett (1893-1970).

### **CHAPTER 14. WRITING MEDIUMS**

Writing mediums are able to go into a light trance and allow their hand to be taken over by a spirit person. Chico Xavier from Brazil was able to get messages from loved ones in spirit with their signature. He also wrote hundreds of books dictated by high spirits. Other notable ones were Rev. Stainton Moses and Carlos Mirabelli.

## **CHAPTER 15. THE CROSS CORRESPONDENCES**

Some of the best evidence for the afterlife came through writing mediums under the direction of the no longer living Fred W.H Myers, a Cambridge classics scholar and writer. When he was alive he wanted to find a way of proving that information transmitted through the mediums could not have come from their own unconscious mind. The method he thought up was cross-correspondences – a series of messages to different mediums (from the afterlife) that on their own would mean nothing but which when put together would make sense.

## **CHAPTER 16. PHYSICAL MEDIUMSHIP—LABORATORY**

**EXPERIMENTS.** A 'physical medium' produces phenomena that can be seen, heard or felt by everyone present in a session. Some of the phenomena that develop in physical mediumship include bangs and raps which will answer questions in a code (one rap for yes, two for no). Objects start to move with no apparent cause. We review laboratory experiments with physical mediums.

## **CHAPTER 17. THE SCOPE EXPERIMENT—STUNNING EVIDENCE**

The Scope Experiment from 1992-1998 was a recent example of physical mediumship. The experiments, conducted by Robin and Sandra Foy were held in England, the United States, Ireland and Spain over a period of six years. Senior scientists who participated included Professor David Fontana, Arthur Ellison, Montague Keen (from the SPR), Dr Hans Schaer attorney; Dr Ernst Senkowski, Dr Rupert Sheldrake – and others. Phenomena observed: voices from the afterlife, levitation, materializations of people and objects. NASA scientists formed their own group to continue to communicate with the afterlife entities (Solomon, 1999:73, 189).

## **CHAPTER 18. INDEPENDENT VOICE MEDIUMS**

'Independent voice' mediumship, sometimes called 'direct voice' mediumship, is a form of physical mediumship. People who have

crossed over can be heard talking in their own voices which do not come from the vocal cords of the medium. We have been privileged to have experienced independent voice mediumship with David Thompson – who also a materialization medium. Other great independent voice mediums were John Sloan who worked closely with notable author Arthur Findlay. Leslie Flint is one of the major direct voice mediums was thoroughly tested.

### **CHAPTER 19. MATERIALIZATION MEDIUMSHIP**

Of all the evidence for the afterlife there is nothing as convincing for the existence of the afterlife as materializations. You sit in a locked room where there are a small number of people present. Security is tight. It is impossible for anyone to enter or leave the room ... Suddenly there is another living breathing person among you, walking around, touching you, making jokes and sharing insights about the spirit world. Mediums. Cited include Alec Harris, Rita Goold, Minnie Harrison, Carlos Mirabelli.

### **CHAPTER 20. THE HELEN DUNCAN INJUSTICE**

Helen Duncan was a magnificent materialization medium from Scotland and one of the most important women in psychic history. She was unjustly put in prison in 1944 during WWII because the authorities feared the information that materialized spirits were revealing could harm the war effort. This was one of the greatest injustices ever committed by the British government.

### **CHAPTER 21. SPIRIT VOICES ON TAPE—ELECTRONIC VOICE**

**PHENOMENA** For more than 60 years experimenters in many parts of the world have been tape-recording ‘paranormal voices’. These are voices which can only be heard when the tape is played back. Many of the very short messages claim to be from loved ones who have passed on. By using the proper method of tape recording, they are likely to hear voices of loved one or friends who have crossed over. That’s what

happened to skeptic Dr Peter Bander – he was shocked to hear the voice of his own mother from the grave ...

## **CHAPTER 22. INSTRUMENTAL TRANS-COMMUNICATION (ITC)**

Since about 1980 psychic researchers have claimed that they are making contact with people who have died via radio, telephones and computers. It is highly evidential that the contact is repeatable, is occurring in laboratories in different parts of the world and being subjected to close scientific scrutiny. When it is perfected, ITC has the potential to be the most revolutionary and persuasive evidence for the afterlife.

## **CHAPTER 23. THE OUIJA BOARD**

The ouija board is one of the most widely used methods of 'untrained' spirit communication. It is a primitive form of physical mediumship. Psychics and experienced mediums say that contact is most *usually* with the lowest entities who operate close to our own 'wavelength'. Follow up experiments were done with spirits who “dropped in” to say hello- the identity of many of them was proved to be correct. Psychic investigator Professor Archie Roy says using a ouija board is like picking up total strangers in a bar and inviting them home (Roy 1996: 176). If contact is made with a more refined spirit, the response will usually be polite and uplifting. If contact is made with very low spirits the communication will be rude, stupid, and vulgar.

## **CHAPTER 24. POLTERGEISTS**

The word 'poltergeist' is from German and means 'noisy spirit'. Research into this area from the United States, Brazil, England, Scotland, Ireland, Canada, Finland, Germany, France, Italy, India and Russia and other countries shows that poltergeists really exist and behave in the same way. There have been thousands of poltergeist incidents recorded. Many people have seen solid objects flying in the air, huge kitchen cabinets levitating, plates, glasses and clothing set on fire. Three Psychic researchers claim that poltergeist phenomena sometimes

involve spirits. Following the sudden death of 300,000 people in the tsunami in Thailand poltergeist phenomena were in plague proportions.

## **CHAPTER 25. XENOGLOSSY**

One of the most amazing psychic phenomena is xenoglossy, the ability to speak or write a foreign language a person never learned. It comes up during trance mediumship, writing mediumship, independent voice mediumship and in past life regressions. Fraud, genetic memory, telepathy and cryptomnesia (the remembering of a foreign language learned earlier in life) are sometimes suggested as causes. But when all these possibilities are eliminated two other explanations are left. Either memories of a language learned in a past life *or* communication with a discarnate entity— a spirit person.

## **CHAPTER 26. CHILDREN WHO REMEMBER PAST LIVES**

There have been many cases of children from the age when they can first talk saying that they can remember another life. They talk about another house, other parents and families and about how they died. Sometimes they become so unhappy that their parents arrange for them to go to the place where they say they lived before. In many cases they are able to identify their previous relatives. Usually the memories start to fade by the time the child is six or seven. The evidence of Professor Ian Stevenson is respected even by skeptics.

## **CHAPTER 27. PAST LIFE MEMORIES IN DREAMS**

A number of people have had dreams or nightmares about past lives which produced evidence which could later be verified. An English case that convinced many experts, including psychiatrist Dr. Arthur Guirdham, was that of Mrs. Smith. She was a perfectly sane, healthy ordinary English housewife. However she had for years been suffering from nightmares of being burned at the stake. In 1962 Mrs. Smith went to Dr. Guirdham in a hospital's outpatient department, where Dr. Guirdham worked as a psychiatrist. Dr Guirdham found evidence that she knew

more about the period in history when these events occurred than the leading historians.

## **CHAPTER 28. PAST LIFE REGRESSIONS**

Past life regression simply involves placing a person under hypnosis and asking them to go back through their childhood to a time before they were born. In many cases the person begins talking about his or her life or lives before the present lifetime, about their previous death and about the time between lives including the planning of the present lifetime. The main reason why at least some of these claims must be considered as evidence are:

- the regression frequently leads to a cure of a physical illness.
- in some cases the person regressed begins to speak an unlearned foreign language.
- in some cases the person being regressed remembers details of astonishing accuracy which when checked out are verified by the top historians.

## **31. ANSWERING THE CLOSED MINDED SKEPTICS**

### **Rebutting the evidence for the afterlife is impossible.**

Over the last 25 years we received many emails from mediums and people around the world asking us to help them with some hard skeptics. These are the three favourite issues skeptics raise:

- a) Fraud – (we reply with The Sally Morgan case).
- b) Take up the (fraudulent) million dollar challenge of that king of the skeptics in Florida. (our reply: the greatest paranormal fraud in history).
- c) skeptics think there is only one area of afterlife evidence (eg. Skeptic saying: I reject NDE's therefore there is no afterlife". That is technically a non-sequitur – 'it does not follow'. They show ignorance that there are twenty different areas of afterlife evidence which validates NDE's – where there is a duplicate spirit body of the physical body (duality: mind is different from the brain).

## **CHAPTER 32. WHAT HAPPENS WHEN WE DIE?**

Whilst we respect religious beliefs, what you will read in this book has nothing to do with religion. It is based on information gathered by hundreds of courageous open minded investigators over the last hundred and fifty years who used careful empirical observation and analysis. This tells us that:

- All humans survive physical death, no matter what they believe.
- Hell for eternity and eternal damnation do not exist.
- Shortly before people die they become aware of a loved one waiting to help them on their journey.
- People who die suddenly may go through a period of confusion and not realise that they are dead.

and many other detailed points.
